ACORN POPULATION REPORT

NAVIGATION

Use the Navigation bar above to navigate through this document.

INTERPRETING THE REPORT

The Acorn report describes the relationship between the selected Area profile and the Base area by comparing the penetration of each Acorn Type in the area with the penetration of each Acorn Type in the base.

PERCENTAGE OF PROFILE

Counts of the population within each Acorn Type are shown as raw counts and as percentages of the total volume.

INDEX

The index shows how the percentage of a Type in the area compares with the percentage of that Type in the base. Differences between these two percentages are measured by the Index in the following way.

- An index of 100 indicates that the representation of that Acorn Type is the same in the area as the base.
- An index of over 100 shows above average representation (e.g. 140 shows that this type has a 40% over representation in the file when compared to the base).
- An index of under 100 shows below average representation.

WHAT IS ACORN?

Acorn is a geodemographic segmentation of the UK's population. It segments households, postcodes and neighbourhoods into 6 categories, 18 groups and 62 types. By analysing significant social factors and population behaviour, it provides precise information and an in-depth understanding of the different types of people.

Acorn provides a detailed understanding of the people who interact with your organisation. It helps you learn about their relationship with you. This knowledge gives you the opportunity to target, acquire and develop profitable customer relationships and improve service delivery.

The User Guide (available to download at www.caci.co.uk/acorn) looks at each Acorn type across a wide range of demographic, behavioural and attitudinal attributes. The descriptions of each category, group and type provide an overview of the wider range of topics for which information is available.

Acorn draws on a wide range of data sources, both commercial and public sector Open Data and administrative data. These include the Land Registry, Registers of Scotland, commercial sources of information on age of residents, ethnicity profiles, benefits data, population density, and data on social housing and other rental property. In addition CACI has created proprietary databases, including the location of prisons, traveller sites, age-restricted housing, care homes, high-rise buildings and student accommodation. In addition we utilise the traditional inputs of the Census of Population and large-volume lifestyle surveys.

ACORN TOP 3 GROUPS - POPULATION

© 2016 CACI Limited and all other applicable third party notices (Acorn) can be found at www.caci.co.uk/copyrightnotices.pdf

1.

Acorn Group G - Successful Suburbs

Index = 1605
Area % = 11

This group comprises home-owning families living comfortably in stable areas in suburban and semi-rural locations. They mainly live in three or four bedroom detached and semi-detached homes of an average value for the locality.

Families might include young children, teenagers or even young adults who have not yet left home. These areas will also include some empty nesters. Within this group, there are also some neighbourhoods with high numbers of comfortably off families of Asian origin.

Incomes are at least of average levels and many earn well above the national average. Many have a level or higher qualifications. People are employed in a range of occupations, including middle management and clerical roles. There is also a number of shop workers and skilled manual workers.

Most people in this group have some savings and would consider themselves financially prudent. The more affluent will have good company cars and will have built up somewhat greater levels of savings and investments. Many will have pensions through their employer and others will have private pensions.

These are occasional rather than heavy users of the internet although their phone is more likely to have internet capability than not. Generally they are less keen on marketing communications other than by email.

Leisure interests are varied with photography, computing, gardening, travel, and golf a little more popular than average.

These are the stable suburban families that make up much of Middle Britain.

2.

Acorn Group P - Struggling Estates

Index = 1306
Area % = 1

These are low income families living on traditional urban estates. While typically two-thirds rent their homes from the council or housing association some have bought their houses, typically under right to buy, or from a prior tenant who has done so. Since house prices are low the few homeowners may include a number of first time buyers.

A substantial proportion of the housing will be flats or terraced houses although there may also be some semi-detached estates. Small properties are more typical but the larger families may be housed in three bedroom houses. Either way there may be some element of overcrowding.

There may be a high proportion of children and the level of single parent households may be double the national average. Childless couples and pensioners are relatively rare.

As is typical of more urban locations the population may include some minority ethnic groups.

Jobs reflect the generally lower educational qualifications and tend to be of a routine nature, perhaps in factories, shops or other manual occupations.

Incomes are low and the numbers claiming Job Seeker's Allowance is typically double the UK average. The numbers claiming income support, disability and other benefits are similarly high. Many will have been refused credit and people having difficulties with debts are likely to be double the average.

Money is tight and shopping tends to focus on cheaper stores, fast food outlets and inexpensive food.

3.

Acorn Group C - Mature Money

Index = 294
Area % = 22

These people tend to be older empty nesters and retired couples. Many live in rural towns and villages, others live in the suburbs of larger towns. They are prosperous and live in larger detached or semi-detached houses or bungalows. Many have two cars, others may have down-sized to live in good quality apartments. Some will own second homes.

These are high income households and even those that have retired have good incomes. Employment is typically in managerial and professional roles. A good number own their homes outright and with many having no mortgage to pay are able to invest their money in a wide range of financial products. While some might have a DAB radio these people do not generally favour new technology and are less likely than average to have a smartphone or tablet PC. Some may prefer free digital TV services to Sky or cable options.

In their leisure time they enjoy gardening, walking, photography or golf. They appreciate good food and wine and will go on regular holidays. They often shop at Waitrose, M&S and John Lewis and may well read the Daily Telegraph, Times, Mail and Express.

These older, affluent people have the money and the time to enjoy life.

SocialScene Acorn groups the entire UK adult population into 6 categories and 18 groups. The SocialScene Acorn consumer classification is focused on the eating-out and on-trade drinks market. The classification uniquely reflects the significance of food in this market and the move away from wet-led venues. The groupings bring together types of offering of a similar market opportunity rather than merely representing a similar level of affluence and general demographics.
